POLARIS™

AGVE's first standardised forklift Polaris sets a new benchmark in performance and reliability.

STANDARD BY DESIGN

Highly accurate movements with laser guided navigation.

Designed to be used with Smoova, the fleet manager system for saving time and energy.

User-friendly experience that makes operation effortless.

Counterbalance: Flexible usage and easy to integrate different lifting technologies. Ideal for various load handling scenarios, as it can get close to the target.

CUSTOMISED ON DEMAND

Polaris is designed to stand out – offering flexible configuration options to suit specific workflows, environments, and operational requirements:

- Battery
- Charger
- Colour
- Camera
- Own logotype
- Safety and service packages
- Display language
- Personalised screen saver and menu colours

AGVE AB

Each Polaris system is designed, built, and installed by AGVE's experienced core teams, ensuring quality at every stage. But the commitment doesn't end at delivery–AGVE supports its customers throughout the entire system lifecycle. With dedicated service, maintenance, and continuous development, AGVE keeps systems running efficiently for decades.

- Safe
- Reliable
- User-friendly
